USER MANUAL

TodoMVC

Visitor

webapp-docs-kit example

October 2026

About this manual

This manual explains how to use **TodoMVC** to keep a simple to-do list. It is written for the **Visitor** role and covers adding tasks, completing them and filtering the list.

It is an example generated with webapp-docs-kit against the public Playwright demo. Screenshots are illustrative; in a real manual any personal data is blurred.

4. Tips and support **7**

1. Introduction

1.1 Purpose

TodoMVC keeps a list of tasks in your browser so you can track what is still pending and what is already done.

1.2 What the Visitor can do

- Add tasks to the list.
- Mark tasks as completed.
- Filter the list to see all, active or completed tasks.

2. Getting started

2.1 Opening the app

Open the app address in a modern browser (Chrome, Edge, Firefox or Safari). No sign-in is needed: the list is stored in your browser.

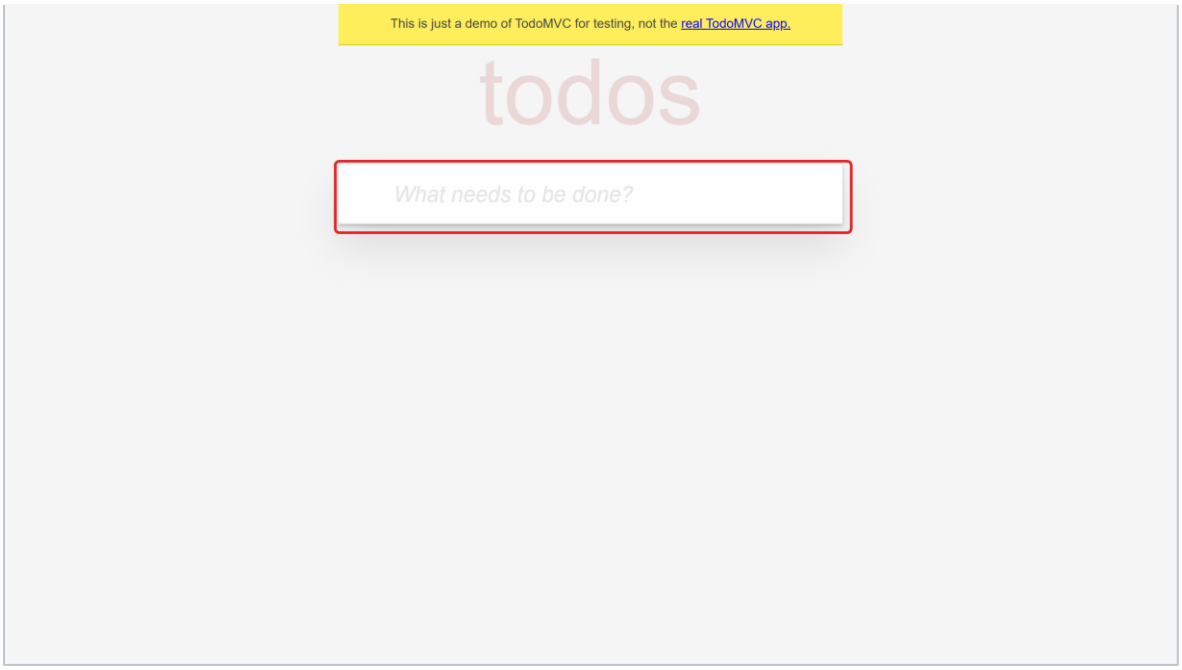

Figure 1. The TodoMVC home page.

> **Important:** the list is saved only in this browser. Opening the app in another browser or device shows a different list.

3. Managing tasks

3.1 Adding a task

a) Click the **What needs to be done?** box.
b) Type the task.
c) Press **Enter**.

The task appears at the top of the list.

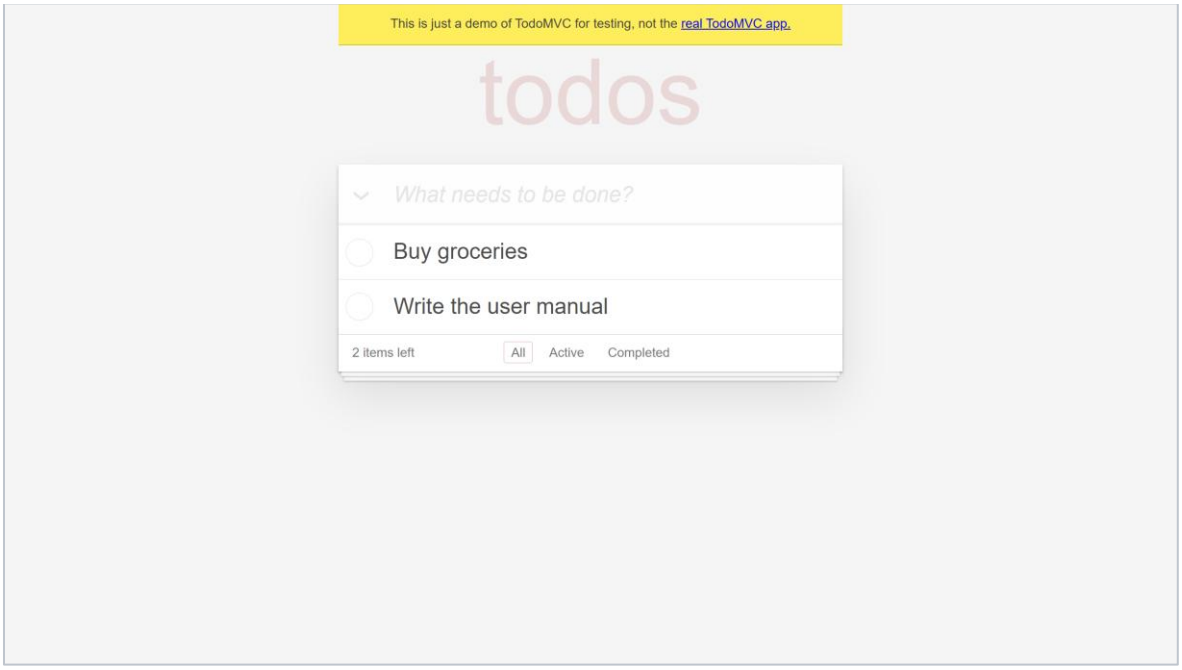

Figure 2. The list with two tasks.

3.2 Completing a task

Click the **circle** to the left of a task. The task is crossed out and the **items left** counter goes down.

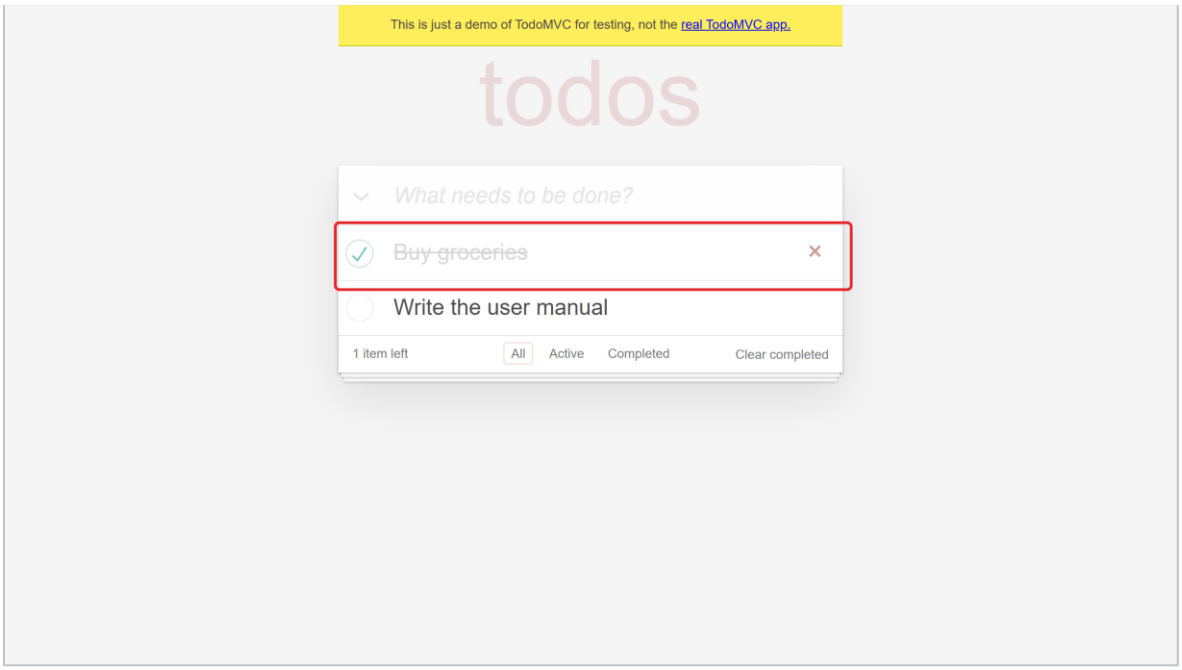

Figure 3. A completed task.

Element	Description
Circle	Marks the task as completed. Click it again to reopen the task.
Cross (Delete)	Appears when you point at a task. Removes the task from the list.

3.3 Filtering the list

Use the filters at the bottom of the list.

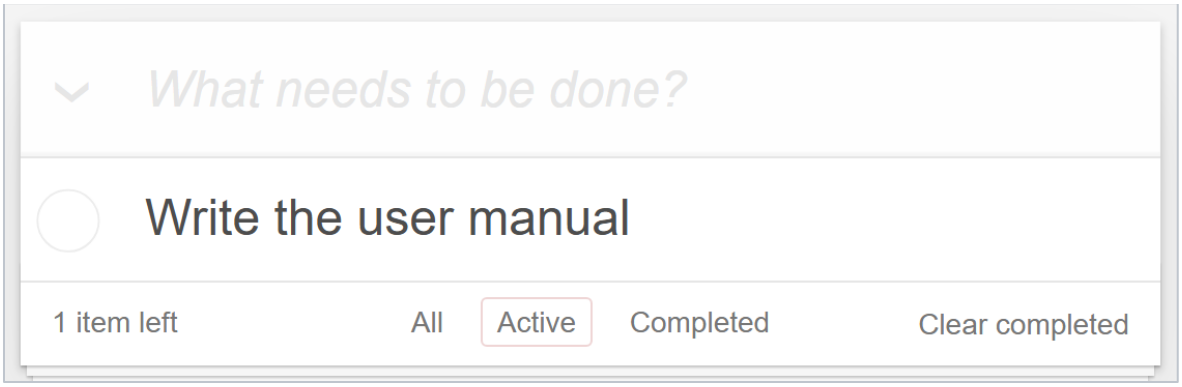

Figure 4. The list filtered to active tasks.

Filter	Shows
All	Every task.
Active	Only pending tasks.
Completed	Only completed tasks.
Clear completed	Removes every completed task from the list.

4. Tips and support

- Keep each task short and specific.
- Clear completed tasks from time to time to keep the list readable.
